PROFESSIONAL SUMMARY

Aspiring AI/ML Engineer with hands-on experience in Machine Learning, Deep Learning, Computer Vision, NLP, and Data Analytics. Skilled in Python, TensorFlow, Scikit-learn, SQL, OpenCV, and FastAPI. Experienced in data preprocessing, feature engineering, model training, evaluation, and deployment. Passionate about developing AI-powered solutions to solve real-world problems. Strong foundation in data structures, algorithms, statistical analysis, and building scalable machine learning applications for practical business and social impact.

WORK EXPERIENCE

Data Science Intern | Solitaire Infosys Pvt. Ltd., Chandigarh | 2 Months

- Performed EDA and data preprocessing using Python, Pandas, and NumPy.
- Developed ML models including Linear Regression, Decision Trees, Random Forest, and KNN.
- Applied feature engineering, hyperparameter tuning, and cross-validation to improve model performance

Data Analyst Intern | Armina Consultancy Service Pvt. Ltd., Delhi | 2 Months

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) using **Python, Pandas, NumPy, and SQL**.
- Analyzed datasets to identify trends, patterns, and actionable business insights.
- Created reports and dashboards using **Power BI/Tableau** for data visualization and KPI tracking.
- Used **Git/GitHub** for version control and collaborated with team members in an Agile environment.

PROJECTS

AI-Powered Sign Language Interpreter | Python, OpenCV, MediaPipe, Scikit-learn

- Built a real-time sign language translation system converting hand gestures into text and speech using computer vision and ML
- Achieved **95% gesture classification accuracy** on test samples.
- Implemented hand landmark extraction and gesture recognition pipeline with MediaPipe achieving high classification accuracy.

Fake News Detection System | Python, NLP, Machine Learning, Scikit-learn, Flask

- Designed and implemented an intelligent Fake News Detection System using NLP Processing and ML Techniques.
- Processed and analyzed 10,000+ news articles using text preprocessing, TF-IDF vectorization, and feature extraction
- Achieved **92% classification accuracy** using Logistic Regression and model optimization techniques.

Real-Time Assistance System for Visually Impaired | Arduino uno, Python, OpenCV, IoT

- Developed an IoT-based Smart Blind Stick using Arduino Uno and Ultrasonic Sensors for safe and independent navigation.
- Integrated real-time gesture recognition for assistive communication via text-to-speech output.
- Designed a portable and cost-effective prototype suitable for real-world deployment.

TECHNICAL SKILLS

Programming Languages: Python, SQL (MySQL, SQLite), HTML, CSS, JavaScript

Machine Learning / AI: Regression, Classification, Decision Trees, Random Forest, KNN, LSTM, NLP, Text Classification

Libraries & Frameworks: Pandas, NumPy, Scikit-learn, TensorFlow, OpenCV, Matplotlib, Seaborn, Flask, FastAPI

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn, Microsoft Excel

Tools & Platforms: Jupyter Notebook, Google Collab, Git, GitHub, VS Code

Core Concepts: Exploratory Data Analysis, Feature Engineering, Hyperparameter Tuning, Model Deployment, Statistics, DSA

CERTIFICATIONS & ACHIEVEMENTS

- Machine Learning Crash Course – Google
- AI & Data Science Certification – NASBA
- Advanced SQL – HackerRank
- Advanced IoT Systems Training – IIT Ropar
- Introduction to AI – Microsoft & LinkedIn Learning
- Hackathon Winner | Organized Technical Events & Workshops at KCET Amritsar

EDUCATION

Khalsa College of Engineering & Technology, Amritsar, Punjab 2023 – 2027

B.E. in Artificial Intelligence & Machine Learning (Hons.) | CGPA: 9.14

Dr. Maharaja Krishan Kapoor Arya Model School, Panipat, Haryana

Intermediate (CBSE) – 82% | Matriculation (CBSE) – 90%

2023 | 2021
